Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For example:

Claim 1, 23, 26, 28 communication system comprising a layer/higher layer, is not fully understood. Layers, as in the seven layer OSI model layers, are hypothetical/abstract.

Meaning, systems may comply with OSI models and their respective layers but a piece of hardware does not comprise of something abstract. When it comes down to it, the layers in figure one are really lines of computer code and each layer maybe e.g., a subroutine.

Claim 1, a second layer for generating multicast data is not fully understood because in complying with OSI layers, data or protocol data units (PDUs) is/are passed down from the higher layers to the lower layers with each layer possibly appending a

Art Unit: 2661

header/trailer. Does the applicant really want to claim this as the second layer doing the generating?

Claim 23, a second layer "consisting" of a MAC for muxing and demuxing. Does the applicant really want to use the term consisting and specify that a MAC is doing the muxing and demuxing?

Claim 26, lines 3-4, "channel for processing" is not fully understood. Channels do not process, nor do they comprise of microprocessors. Channels receive data and data passes along them, as in equating a channel with a garden hose. Water passes through the hose. The hose does not process the water.

Claim 26, last three lines, "processing ... data in a data field type" is not fully understood.

Claim 28, lines 6-10 are not fully understood. For example, it reads as transmitting data on a channel and a channel for transmission of the network, and a channel for control data when the service request is achieved. The examiner does not know exactly what the applicant wants to claim here and believes the metes and bounds cannot be easily known.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David R Vincent whose telephone number is 703 305 4957. The examiner can normally be reached on M-TH.

Application/Control Number: 09/520,363
